TECHNICAL INFORMATIONS ABOUT THE PRODUCT DE-ICER FOR GLASS SURFACES

GRENLAND

GRENLAND is a liquid used for melting ice and cleaning the icy surfaces of windshields and other vehicle windows.

Advantages:

- protects against freezing;
- does not damage surfaces;
- it has a pleasant smell.

QUALITY LEVEL: MANUFACTURING SPECIFICATION

PHYSICAL - CHEMICAL CHARACTERISTICS

Characteristics	Units	Typical values	Test methods
Appearance	-	Blue liquid	visually
Density at 20°C	g/cm ³	0,82	SRPS EN ISO 3675
Freezing point	°C	-50	SRPS H.Z.053

APPLICATION

GRENLAND is an ethyl alcohol-based liquid used for de-icing of the glass surfaces of motor vehicles in winter conditions. It is safe for rubber and paint and is effective up to -50 ° C. In just a few moments after application, defrosts ice from the surface of the glass, leaving it smooth and without scratches. It does not contain methyl alcohol. It defrosts glass very quickly, prevents the re-formation of the ice layer and ensures good visibility.

APPLICATION: Spray the frozen glass evenly and leave it like that for a couple minutes. If necessary, repeat the procedure for heavily frozen glass.

When the glass is defrosted, it needs to be sprayed again in a thin layer.

STORAGE

GRENLAND - should be stored in their original packaging protected from the direct influence of the atmosphere.

PACKAGING:

0.7 L	2 L	3 L	5 L	10 L	200 L	1000 L
x 10 pcs
